PROFESSIONAL SUMMARY

Systems-focused Network Support Executive with a B.Tech in Computer Science (Artificial Intelligence). Combines hands-on experience in enterprise networking, telemetry monitoring, and incident management with a strong background in Linux administration, Python scripting, and cloud security labs. Experienced in diagnosing infrastructure anomalies, writing clear technical asset documentation, and delivering reliable L1/L2 escalation support.

EDUCATION

Madanapalle Institute of Technology and Science | Angallu

Bachelor of Technology in Computer Science Engineering (Artificial Intelligence) | Dec 2021 - May 2025

Bharathi Junior College | Madanapalle

MPC Intermediate | June 2019 - March 2021

PROFESSIONAL EXPERIENCE

Ibus Technologies Private Limited | Network Support Executive| Bangalore | Dec 2025 – Present

- **Systems Monitoring & Telemetry:** Monitor enterprise network health and system availability, conducting initial log analysis, alert classification, and root-cause identification.
- **L1/L2 Troubleshooting:** Perform independent troubleshooting on core routing protocols (BGP, OSPF) and network services (DNS, DHCP, RADIUS) via Linux command-line tools.
- **Incident Lifecycle & Documentation:** Manage incident response lifecycles, documenting network anomalies and creating structured asset documentation to streamline Tier 3 engineering escalations.
- **Security & Reliability Assurance:** Validate IPSec/GRE VPN tunnels, firewall ACLs, and VLAN segmentation to ensure security baselines and uptime SLAs.

SKILLS

Operating Systems & Infrastructure: Linux (Ubuntu/Debian, Fedora), Command-Line Administration, Bash Scripting, Systems Design & Reliability.

Programming & Automation: Python, SQL, Bash, Java, C.

Networking & Protocols: TCP/IP, BGP, OSPF, DNS, DHCP, RADIUS, IPSec/GRE VPN, Snort IDS, pfSense, Packet Analysis (Wireshark).

Cloud & Security Analytics: AWS (EC2, S3, CloudTrail, GuardDuty, IAM), ELK Stack (Elasticsearch, Logstash, Kibana), SIEM, Splunk.

Operations & Engineering: Incident Response Lifecycle, Asset & Technical Documentation, Alert Classification, Root-Cause Analysis

ACHIEVEMENTS

Published research paper titled *"Real Time Car Accident Detection and Emergency Response Using Enhanced YOLO"* at the 5th EAI International Conference on Cognitive Computing (ICCSSAS 2025).

PROJECTS / OPEN-SOURCE

Hybrid Virtual Security Operations Center (vSOC) & Network Monitoring Lab | (Networking)

- Designed and deployed a multi-tier virtualized system environment to simulate operational stress, physical forms, and defensive monitoring. Implemented pfSense for network segmentation and integrated an ELK Stack via Security Onion to ingest telemetry and ensure system reliability.

Virtual SOC & Network Telemetry Monitor | (Tech Stack: Python, Bash, Windows Event Logs, Wireshark)

- Developed automated script parsers to analyze Windows Security Event Logs (identifying Event IDs like 4624, 4625, and 4688) to track system performance and flag anomalous behavior.

Real Time Car Accident Detection and Emergency Response Using Enhanced YOLO | (Python)

- Deployed a cloud telemetry environment on AWS to capture API activity logs and run automated threat analysis routines.

Cloud Security Monitoring & Threat Detection Lab | (Tech Stack: AWS CloudTrail, Amazon GuardDuty, IAM)

- Implemented a cloud-based monitoring environment to establish real-time operational visibility, capturing API activity logs and running automated threat analyses.

CERTIFICATIONS

- Google Cybersecurity Professional Certificate – Google Skills
- CCNAv7: Enterprise Networking, Security, and Automation – Cisco
- Python – Coding Ninjas
- Java – Simplilearn
- Splunk - Data and Tools for Defense Analysts
- School of AI Certified Cloud Practitioner (Foundational)
