GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Systems-focused L1/L2 Network Support Engineer with a Bachelor's in Computer Science specializing in Artificial Intelligence, combining expertise in infrastructure monitoring, independent problem-solving, and cross-functional technical escalation. Proven track record in managing system lifecycles, ensuring high availability and reliability, and delivering comprehensive engineering documentation with minimal supervision.

EDUCATION

Madanapalle Institute of Technology and Science

| Angallu

Bachelor of Technology in Computer Science Engineering (Artificial Intelligence) | Dec 2021 - May 2025

Bharathi Junior College

| Madanapalle

MPC Intermediate | June 2019 - March 2021

PROFESSIONAL EXPERIENCE

Ibus Technologies Private Limited | Network Support Engineer | Bangalore | Dec 2025 – Present

- **Systems Monitoring & Telemetry:** Act as the first line of defense for enterprise network and system health, performing continuous monitoring, initial log analysis, and alert classification.
- **Independent L1/L2 Troubleshooting:** Execute preliminary diagnostics independently or with minimum supervision on core routing protocols (BGP, OSPF) and essential services (DNS, DHCP, RADIUS) using command-line tools.
- **Incident Lifecycle & Documentation:** Manage the incident response lifecycle by documenting network anomalies and generating structured asset documentation for Tier 3 escalation teams.
- **Security & Reliability Assurance:** Verify IPSec/GRE VPN tunnel status, firewall ACLs, and VLAN segmentation to ensure baseline system security and availability are maintained.

SKILLS

Systems Engineering & Product Design: Systems Design, Lifecycle Management, Reliability & Availability Assurance, Technical Asset Documentation, Requirements Analysis.

Networking & Infrastructure: TCP/IP, BGP, OSPF, DNS, DHCP, Snort IDS, pfSense, Packet Analysis.

Programming & Scripting: Python, SQL, Bash, Java, C.

Cloud & Deployment: Linux, Git, AWS (EC2, S3), Model Deployment.

Data & Security Analytics: ELK Stack (Elasticsearch, Logstash, Kibana), SIEM, Splunk.

ACHIEVEMENTS

Published research paper titled "*Real Time Car Accident Detection and Emergency Response Using Enhanced YOLO*" at the 5th EAI International Conference on Cognitive Computing (ICCSAS 2025).

PROJECTS / OPEN-SOURCE

Hybrid Virtual Security Operations Center (vSOC) & Network Monitoring Lab | [Link] (Networking)

- Designed and deployed a multi-tier virtualized system environment to simulate operational stress, physical forms, and defensive monitoring. Implemented pfSense for network segmentation and integrated an ELK Stack via Security Onion to ingest telemetry and ensure system reliability.

Virtual SOC & Network Telemetry Monitor | [Link] (Tech Stack: Python, Bash, Windows Event Logs, Wireshark)

- Developed automated script parsers to analyze Windows Security Event Logs (identifying Event IDs like 4624, 4625, and 4688) to track system performance and flag anomalous behavior.

Real Time Car Accident Detection and Emergency Response Using Enhanced YOLO | [Link] (Python)

- Engineered a real-time accident detection product prototype optimized for high-speed performance, precision, and immediate emergency alerting.

Cloud Security Monitoring & Threat Detection Lab | [Link] (Tech Stack: AWS CloudTrail, Amazon GuardDuty, IAM)

- Implemented a cloud-based monitoring environment to establish real-time operational visibility, capturing API activity logs and running automated threat analyses.

CERTIFICATIONS

- Google Cybersecurity Professional Certificate – Google Skills
- CCNAv7: Enterprise Networking, Security, and Automation – Cisco
- Python – Coding Ninjas
- Java – Simplilearn
- Splunk - Data and Tools for Defense Analysts
